

Swiggy Sales Analysis Report

A comprehensive SQL-based data warehousing and BI analysis of **197,403 order records** — uncovering revenue patterns, customer behavior, restaurant performance, and regional trends across India.

BUSINESS INTELLIGENCE

SQL ANALYTICS

Project Objectives

Raw Swiggy transactional data was transformed into meaningful business insights through a **Star Schema data warehouse**, enabling efficient reporting across six key dimensions:

- Revenue Generation
- Customer Spending Behavior
- Restaurant & Category Performance
- Regional Demand Patterns
- Customer Satisfaction Trends

Data Preparation & Warehouse Design

Star Schema Architecture

Data Cleaning Results

All business-critical columns validated for nulls, blanks, and duplicates.

27 Duplicates

Detected & removed

197,403

Clean order records

Fact table stores Price, Rating, Rating Count, and foreign keys linking all dimensions — improving scalability, reporting speed, and maintainability.

Key Performance Indicators

197K

Total Orders

Across multiple Indian cities and food categories

₹53M

Total Revenue

Significant food delivery market presence

₹268

Avg Dish Price

Mid-range pricing segment

4.34

Avg Rating /5

Consistently high customer satisfaction

Time-Based Analysis

Key Time Insights

Top Months

January, August, and May lead in both order volume and revenue. Demand is evenly distributed with no major seasonal fluctuations.

Q2 Peak

Quarter 2 recorded the strongest performance with 74,155 orders.

Weekend Surge

Saturday, Friday, and Wednesday are the highest-order days. Monday is the lowest — a clear opportunity for targeted promotions and staffing optimization.

Location-Based Analysis

Top Cities by Order Volume

Regional Insights

Top Revenue States

Karnataka, Uttar Pradesh, Telangana, Maharashtra, Delhi

Highest Rated States

Kerala (4.44), Mizoram (4.41), West Bengal (4.41)

Growth Markets

Gangtok, Kohima, Aizawl — smaller cities with untapped potential

Restaurant Performance

🏆 By Order Volume

1. McDonald's
2. KFC
3. Burger King
4. Pizza Hut
5. Domino's

QSR chains dominate consumer demand.

💰 By Revenue

1. KFC
2. McDonald's
3. Pizza Hut
4. Burger King
5. Domino's

KFC earns more despite fewer orders — higher average order value.

★ Highest Rated

- Sakana
- Vijay Dairy
- Radhey Lal's Parampara Sweets

Regional restaurants outperform national chains in satisfaction.

Food Categories & Customer Spending

Top Categories by Revenue

Spending Distribution

₹100–₹299 is the core spending range (110,757 orders combined). Top dishes include Choco Lava Cake, Veg Fried Rice, and Paneer Butter Masala — desserts and staples drive strong demand.

Customer Rating Analysis

Revenue vs. Rating

Key Findings

Mid-Rated = More Revenue

4.0–4.49 dishes generate **₹33.37M** vs. only **₹6.64M** for 4.8+ — volume drives revenue, not rating alone.

Price ≠ Satisfaction

Avg ratings range only from **4.33** (₹100–299) to **4.39** (₹500+). Food quality matters more than price.

Opportunity

Highly-rated dishes are underutilized — increased visibility could unlock significant revenue.

Strategic Recommendations

01

Expand in High-Volume Cities

Deepen restaurant partnerships in Bengaluru and other top-performing metros.

03

Boost High-Rated Dish Visibility

Feature top-rated dishes prominently to convert satisfaction into revenue.

05

Replicate Kerala & Mizoram Success

Study and scale their customer experience strategies across other regions.

02

Focus on ₹100–₹299 Segment

Drive promotional campaigns and bundle offers where demand is strongest.

04

Invest in Top Categories

Prioritize Main Course, Burgers, and Desserts for marketing and partnerships.

06

Support Regional Restaurants

Feature high-rated local brands through promoted listings and placements.
